1.The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fisher-Fruhholz et al in view of Dickerson (see col. 27, lines 37-50) essentially for reasons of record noting the following.

The primary reference discloses the basic claimed method, lacking merely the teaching of positioning a gasket in the moat area. Dickerson teaches positioning an O-ring or gasket around the hybridization chamber, and such can be placed into a "groove in either the lid or base plate". Clearly, the latter would be analogous to the moat produced in the primary reference and hence the use of a gasket in the primary reference is submitted to be obvious.

2.Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.

While the 102 has been dropped in view of the amendment, it is respectfully submitted that a valid 103 still exists against the claims as amended. Applicant suggests that the claims have not been met since Dickerson utilizes rigid materials and does not show the instant moat formation. However, the primary reference is applied to show these aspects. Dickerson is merely being applied to show the use of a gasket around the hybridization chamber, which the reference clearly does teach. The use of such a gasket in the moat of the primary reference is submitted to be prime facie obvious. In

essence, it appears that applicant is arguing the references separately when the rejection is based on the combination.

3.Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
